

Swing™ – The high Quality electric Breastpump with 2-Phase Expression Technology

*No. 1 choice
of hospitals
& mothers*

Design and Nature
perfectly combined
to support modern
Mothers

Swing™

The electric Breastpump with
2-Phase Expression Technology.
Ideal for daily use; perfect for active
Mothers.

Why do mothers buy it?	Swing is a very reliable breastpump which offers high quality and great comfort. It pumps more milk in less time and is compact and quiet, so it can be used discreetly on the move.	Page 4/5
What are the benefits?	Efficient, comfortable, easy to use and discreet.	Page 6
Who buys it?	Mothers who work part-time, pursue a hobby, engage in sports, etc. They don't want to spend too much time pumping. Also ideal in case of latch-on problems, breast infection or sore nipples.	Page 7
Why is it better?	The Medela 2-Phase-Expression Technology delivers mothers more milk in less time. Plus, all parts that come into direct contact with breastmilk are (and have always been) free of BPA.	Page 8
Everything a breastfeeding mother needs	Medela offers a full range of products for all the needs of a breastfeeding mother.	Page 9
Calma: the right feeding solution	Calma is the right feeding solution for mothers who pump.	Page 10
Who is behind it?	Medela is your leading partner when it comes to breastfeeding. Learn more about how you can profit with Medela solutions.	Page 11

Swing™ Specifications & why a Mother would choose it

	Swing	Advantage
Technology	Research-based 2-Phase Expression Technology	2-Phase Expression guarantees efficiency and comfort.
Handling	Electric	Electric handling provides a convenient and effortless pumping session.
Dimension Pump	12 x 13 x 5.7cm	Swing with its compact design is easy to hold and transport.
Weight	300g (incl. batteries)	The light pump offers mobility.
Material	PE, PP, TPE	All parts can be cleaned very easily – boiling, microwave bags, sterilising, etc.
Content	Pump consists of only 6 parts	It is intuitive and easy to assemble, use and clean.
Breastshield	Individual sized PersonalFit, soft and gentle SoftFit	More comfort due to the choice of two different breastshields, depending on the mother's individual preference.
Vacuum (Stimulation/ Expression) Cycles (Stimulation/ Expression)	50-120mmHg 50-250mmHg ~100 cycles/minute ~45-72 cycles/minute	The pump switches automatically from stimulation- to expression phase. Or mothers can switch between the two phases or choose the most comfortable vacuum level easily by pushing one button individually.

	Swing	Advantage

Power Supply	4 x 1.5V alkaline or individual mains adapter	It is a flexible solution and provides mobility.
Noise	max. 57dBA	Swing is one of the most quiet electric breastpumps.
Warranty	6 months	Mothers benefit from a reliable and lasting solution.

What are the Benefits of using Swing™?

Breastfeeding generally gives babies the healthiest start in life.

Breastmilk contains everything the baby needs – in just the right combination; it varies not just over the months, but also within the day. At times when a mother needs to be away from her baby – or when the nipples need a rest – expressing breastmilk, using the unique research-based Medela technology, makes feeding breastmilk by bottle the next best option.

Swing is one of the most popular single electric breastpumps in the world.

- | Efficiency: More milk in less time due to our 2-Phase Expression Technology.
- | Tailored: ideal for daily electric pumping.
- | Comfort: various vacuum levels and setting options.
- | Easy: intuitive to assemble, use and clean.
- | Convenient: quiet and compact design, ideal for discreet pumping.

Who is likely to buy a Swing™?

Swing is the pump of choice for active and modern mothers who need a pump for daily use. Whether they work part-time, want to have an evening out, do some sport to get a change, or if they just want to go shopping, the electric breastpump Swing is a convenient solution for mothers who don't want to spend too much time pumping.

We also recommend Swing for mothers who are having difficulties with breastfeeding, e.g. latch-on problems, breast infection or sore nipples. Mothers get relief and can benefit from a short break from breastfeeding. But they still do best for their baby by feeding breastmilk.

How can you identify Swing mothers?

We have collected a handful of questions that will help you find out if Swing is the best solution for the mother in front of you:

- | What is your main reason for looking for a breastpump?
- | How long do you plan to breastfeed?
- | Do you need to overcome breastfeeding difficulties?
- | Do you intend to go back to work – part-time or full-time?
- | Would you like to share feeding times with your partner?
- | Would you like to have some more time for yourself?

What sets Swing™ apart from other pumps?

Swing is based on our unique 2-Phase Expression Technology:

Over many years of research at the University of Western Australia we investigated the natural sucking pattern of newborn full term babies. What we found was that babies initially use short, fast sucks to stimulate the milk ejection reflex. Once the milk begins to flow, they change to a slower, deeper rhythm to actually feed. We at Medela translated this knowledge into technical know-how – and professional products that help mothers to get more milk in less time.

Thanks to our 2-Phase Expression Technology the breastpump simulates the natural infant sucking behaviour at the mother's breast. Using the electric breastpump feels very comfortable – almost like breastfeeding. To increase comfort even more, we sell Swing with two different breastshields – to suit a mother's individual needs. In addition, with the 2-Phase Expression Technology the pumping time is reduced.

What else is needed for successful pumping?

The package contains:

1x Pump	1x Bottle	1x PersonalFit Breastshield
1x Tubing	1x Stand, Lid, Disc, Cap	1x SoftFit Breastshield
1x Connector	1x Bag	1x Mains Adapter

All parts that come into contact with breastmilk are completely BPA-free!

Other products your customers might find helpful:

- I B-Well Bottle Warmer/B-Well Steam Sterilizer:** Gently heats breastmilk and keeps it warm on constant end temperature - and can neatly be stored in the B-Well Steam Sterilizer.
- I PureLan:** natural lanolin to treat sore nipples.
- I Hydrogel Pads:** Provides instant relief with a unique cooling effect.
- I Pump&Save Breastmilk Bags:** The practical stand-up bag, that makes collecting and freezing easy and hygienic

Calma: the right feeding solution

Suggest Calma for feeding breastmilk!

This breastfeeding-friendly, revolutionary feeding solution is the only research-based feeding device that helps maintain the unique feeding behaviour of a baby: the baby can feed, pause and breathe regularly; milk will not flow unless a vacuum is created, and flow immediately stops when the baby relaxes to pause and breathe. Thus, a baby's natural feeding behaviour will be maintained – enabling mothers to switch from bottle to breast easily.

For the breastfeeding and pumping mother, Calma means...

- ... she needs just one type of teat throughout her breastfeeding duration.
- ... the baby can feed, pause and breathe regularly.
- ... milk will not flow unless a vacuum is created.
- ... milk flow stops when the baby relaxes to pause and breathe.
- ... her baby's natural sucking rhythm will be maintained, enabling easy transition back to the breast.

This is absolutely unique!
